

**TRIOTONE<sup>®</sup> TOUCH SWITCH**

The TrioTone<sup>®</sup> touch switch is a great-value solution that provides the flexibility of colour changing technology for a streamlined price range.

The sensor module plugs directly into any standard 2-pin LED driver, and it features a 4-pin female connector, which will allow any CCT product to be connected from the Sensio range. The touch switch cycles between 3 colour settings: cool, natural, and warm white and enables the light source to be matched to any interior design style, as well as providing the flexibility to be changed in the future.

BENEFITS
• Cost effective solution without compromising on functionality
• Operation Simplicity: A plug and play solution and straightforward functionality
• Designed for ease of installation and use no need for a remote control, App control, or smart drivers

KEY FEATURES
• Equipped with a memory function that retains the last used setting
• Can be powered from a Titan+ Drivers
• Compatible with all Pro (CCT) lighting product
• Control temperature settings of warm, natural and cool white
• Touch sensor button
